

MEASURES OF MOBILITY SCOOTER USE

Researchers from the University of British Columbia are looking for volunteers to participate in a study examining measures of scooter use.

We are looking for individuals who:

- are 19 years of age or older;
- have owned a scooter for at least 3 months;
- have mobility limitations that prevent you from going more than one block without an assistive device;
- can read, write and speak in English.

If you choose to take part and are eligible to participate:

You will be asked to complete 2 data collection sessions (Session 1 will be **2 hours** and Session 2 will be **2.5 hours**).

During these sessions, you will answer **questions** about your scooter use and daily life, and complete a test of your scooter mobility skills.

You will also be asked to take part in an **interview** with one of our research assistants.

To cover the costs of transportation and any other expenses, you will be a \$25 honorarium per visit.

Assessments will take place at GF Strong or Blusson Spinal Cord Centre.
Scheduling based on availability.
